

Line Of Profitable Exploitation In Northern Areas Being Rapidly Pushed Backward

No doubt many people heard of the Sverdrup Islands, for the first time when they read that this Arctic group now belonged to Canada. The Dominion has paid Commander Orre Sverdrup the sum of \$67,000 in return for his exploratory services in that region from 1898 to 1902, and in return the Government of Norway fully recognizes Canadian sovereignty, which now covers the entire Arctic sector north of the Canadian mainland.

The Sverdrup group has a total area about equal to that of Nova Scotia and according to Commander Sverdrup, who is corroborated by Inspector Joy, it holds a peculiar species of rabbit which marches upright on its hind legs. Otherwise the islands seem to be notable chiefly for the fact that they are our furthest north properties, 850 miles beyond the Arctic Circle.

So Commander Sverdrup has his \$67,000 and we have the islands, and everybody seems to have come out of the deal with profit with the exception of the Government of Norway, and it is not complaining. We do not quite know what we are going to do with the islands. There appears to be no practical advantage in a rabbit which walks on its hind legs, and at the moment this Arctic is not a convenient summer resort. Nevertheless it is well that Canada's northern regions should be rounded off by legal possession of this group. Recalling the extraordinary manner in which the line of profitable exploitation has been pushed backward in recent years, few would care to predict that Sverdrup's discoveries are worthless. A few years ago Hudson and James Bays were far beyond the bounds of civilization and now there is a railroad to Churchill and next year the rails are going to Moose Factory. The future may hold for the Arctic regions advances relatively just as sensational, and in the meantime a good many newspaper readers and editors will have consulted their atlases and will know just a little bit more about the receding North.—Ottawa Journal.

Decrease In Fall Plowing

Only 36 Per Cent, As Compared With 45 In 1929

Fall plowing was not so good this year as last. A crop report issued by the Dominion Bureau of Statistics states: "For all Canada the proportion of land intended for next year's crops that had been plowed at October 31, 1930, is estimated at 36 per cent, as compared with 45 per cent. in 1929, and 29 per cent. in 1928. By provinces, the proportions for 1930 are as follows, with the corresponding figures for 1929 within brackets: Prince Edward Island, 60 (75); Nova Scotia, 32 (48); New Brunswick, 72 (58); Quebec, 74 (78); Ontario, 60 (68); Manitoba, 60 (84); Saskatchewan, 21 (49); Alberta, 8 (42); British Columbia, 43 (46)."

A National Undertaking

The B.C. Telephone Company has announced the beginning of construction of British Columbia's link in a complete trans-Canada telephone system. The provincial link will cost \$1,250,000. All Canadian telephone companies are co-operating in this national undertaking.

"Your little boy has stolen a cake at the bakers."

Russia Buys Hogs

Purchased Twenty Thousand Pigs From Germany

Twenty thousand pigs, worth several million marks, have been bought by the Soviet Government from German farmers and transported to Russia via Poland in sealed railway wagons. The Soviet is paying 20 per cent. of the purchase price in cash and the rest on a credit guaranteed by the German Government. The pigs are to be used for breeding purposes. It is said, but it is believed in Germany that most of them will eventually find their way into the Russian slaughter houses.

Encourage Poultry Raising

Booklet To Be Sent Out This Winter To Saskatchewan Breeders

Between 3,000 and 4,000 poultry breeders of Saskatchewan will receive this winter a catalogue booklet to assist them in their work, according to arrangements made by the Saskatchewan Poultry Breeders' Association executive. The catalogues will contain the names of owners of "record of performance" flocks, of which there are from 15 to 18 in the province, approved flock breeders and turkey breeders.

ATTENTION SCHOOL GIRLS!

All Tingley models are created and sketched in Paris and the patterns are made in New York.

If you'd like to look really smart, you must have a w. when frock with a bolero jacket.

For fairly wear, feather weight tweed offers a marvelous possibility to say nothing of its decided chic. It is adorable in Bordeaux-red mixture with a blouse of plain white linen or wool jersey.

The all-round best-seller, skirt, belted at the natural waistline, is so pretty and girlish. The blouse has long sleeves, so the little bolero jacket may be removed when too warm in the classroom.

Wool challis prints, wool jersey crepe patterned and plain woolsens, covert cloth and tweed-like cottons are suitable for this practical model. This pattern may be obtained in sizes 6 to 14. It is ready for immediate delivery. It is hand cut.

Send 25 cents in stamps or coin to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Policy To Help Agriculture

Constructive Policies Are Outlined By Federal Minister Of Agriculture

Great increase in pork production in Canada on account of the grain situation was predicted by Hon. Robert Weir, Federal Minister of Agriculture for Canada at a recent banquet in Toronto given by him on behalf of the Federal Government to agriculturists, business executives and government representatives attending the Royal Agricultural Winter Fair. Mr. Weir outlined a constructive policy for promoting greater prosperity for agriculture in Canada, emphasizing quality production. For improvement of live stock the Canadian Government will supply sires where demand justifies, arranging change of location after two years and will supply breed sires of bacon type at cost to farmers and hopes to import outstanding sires of different breeds of horses. It is also proposed to set up laboratories available at nominal fees to eradicate disease from poultry and to take effective steps to prevent importation of disease. Hon. Mr. Weir advocated more scientific methods of feeding, using home grown feeds and attention to science of marketing, as measures calculated to insure Canada's continued and increasing importance in agricultural production.

Not the Last Word

Commercial Fish May Yet Be Found In Northern Bay

The report of fish scarcity in the deeper waters of Hudson Bay is not the last word in that important respect. There remain the shallower depths of James Bay, the estuary of immense inland streams where various species—and many fish—exist and have been taken. The same condition exists in Northern Manitoba where salt and fresh water commingle, where food is washed into the inlets and stream mouths. Fish in commercial quantities have been taken there.

Strong Canadian Wool

Tests made by the Forest Products Laboratory, of the Forest Service, Department of the Interior, Canada, show Douglas fir to be one of the strongest and stiffest of Canadian woods.

New And Unique Mineral Found In Alberta May Have Far Reaching Possibilities

Crate Feeding Pays

Many Good Reasons Why Crate Feeding Of Poultry Is Profitable

Some very good reasons why crate feeding poultry pays are supplied by the Division of Poultry Husbandry of the Dominion Experimental Farms, among which are the following:—

Crate feeding pays because it produces the milked grades which bring the best prices.

The leading wholesale merchants

are now buying poultry by government grades, with substantial differentials between each grade.

The premium assured for birds which grade "Milked" makes crate feeding well worth while.

All poultry intended for eating

purposes should be properly finished before being marketed.

The farmer should crate feed because: It is the only way by which he

can get the premium assured for milked poultry; the last pound, which brings the finish, costs the least to produce and increases the value of the bird by from 50 to 75 cents or more; it is the best way in which to properly finish poultry for market.

The consumer wants milked poultry because: It is the milked grades alone which give assurance of the quality which satisfies; it gives him the best value for his money in tender succulent chicken; it comes from the oven tender, juicy and sweet, the kind of bird he really likes to eat.

Manitoba Butter

Sixty Carloads Shipped This Year To Toronto Market

M. A. Gibson, provincial dairy commissioner, states that since 1915 nearly \$20,000,000 worth of creamery butter has been shipped out of Manitoba, the peak being reached in 1929, when 260 carloads valued at \$2,067,000 were shipped. This year 46 carloads have been shipped to the Toronto market where Manitoba creamery butter commanded a premium over the local product.

Long and somewhat secretive laboratory investigations are expected, shortly, to add a new mineral to the roster of the Dominion's products. Though research was carried on in university and industrial laboratories in the east, principally Toronto, manufacture is to be chiefly in the west.

The mineral is vermiculite, or as it is more commonly known, zonolite. Its potential uses are chiefly as insulation and as an acoustical treatment in buildings.

Samples of the raw material seen in Calgary, were, in appearance and to touch like crude mica of dark green color. It is a silicate and insoluble in most acids. Coming from the mine, it varies in size from dust to pieces several square inches in area.

In the raw form, it weighs 114 pounds to a cubic foot. But, once heat is applied to it, it expands enormously till it has a bulk weight of approximately 10 pounds per cubic foot. It is this peculiar characteristic, research workers say, which gives it its commercial possibilities. It also changes in color to a lustrous gold. In Calgary tests have been made by grinding the mineral over different size wire screens, then firing it in a 20 ft. kiln.

"The economic value of zonolite," says Angus Graham, Toronto research engineer, who came west to aid in the experiments, "is attributable to its thermal and sound insulating properties, its ability to withstand high temperatures, its light weight and pleasing appearance."

He goes on to say that not only does it not burn but that tests show that it does not readily transmit heat. Canadian experiments are supported by highly technical investigations carried on by the Bureau of Standards at Washington. The mineral was used as high temperature insulation for bake ovens and dry kilns, pipes and boilers.

Tests made by Prof. G. R. Anderson, of the University of Toronto, in his laboratory, demonstrated the zonolite's ability to absorb sound. The eastern scientist used it in the form of a lustrous gold plaster, three-quarters zonolite, one quarter wood pulp. His research shows that, at a tone frequency of 512, it has a sound absorptive coefficient of .25—in other and non-technical words, it soaks up sound and noises to a degree that makes its use feasible in treating this nuisance in buildings. Since psychologists are, at the same time, reporting the adverse effect of too much noise on the human system, the discovery of the mineral is timely.

So far, chief sources of supply are in the United States, but traces of the material have already been found in Canada and these are being carefully followed up. Potential development is largely due to the work of Canadian engineers and scientists.

Possibilities of the mineral were discovered by accident. E. N. Albee, while prospecting an old mine shaft for molybdenum and vanadium, placed a miner's candle in the wall of the shaft. It touched a projecting piece of vermiculite. Noticing with surprise the expansion and change of color under the flame, he took samples. This led to the development.

Research work has been carried on with no publicity. Only now have the results been issued in technical papers. Not will any of those linked with the work make claims for anything revolutionary. They simply list the characteristics of a new and unique mineral, expressing the opinion that it will soon be utilized commercially, and generally. It has already been tested in the west as an acoustic treatment on theatres. One large Canadian concern is, however, sufficiently impressed by the results to sponsor continued experiment and test manufacturing processes in the west.

Heavy Wheat Shipment

A consignment of 200,000 bushels of wheat has been sold to the Mexican Government on behalf of the Canadian Wheat Pool. The deal was put through by the Canadian trade commissioner to Mexico, according to an announcement made at the office of Hon. H. H. Stevens, Dominion Minister of Trade and Commerce.

COLD MOST COSTLY OF ALL ILLNESSES

In this age of putting values upon everything the ordinary common cold has not escaped. Officials of the Department of Health have issued a statement declaring the ordinary common garden winter cold is one of the most formidable enemies of the public health. Colds take more dollars and cents out of the workers' pockets in one year than any other ailments. They are responsible for a greater loss of time from school and work than any other simple cause.

A cold does not stop at stalling one day's work. It often takes a far greater toll of time, money, future health and usefulness. A common for other and more serious diseases such as pneumonia, bronchitis, heart disease, etc.

Few people are immune to colds. It is the commonest and most wide spread of the communicable diseases. Despite the great advance in medical knowledge, there has been no general agreement as to the nature of the infectious agent which carries the cold from one person to another, but the research body of the Johns Hopkins University have been engaged in a five-year study of this universal malady and part of their summing up reads:

"The common cold comes from contact with a person infected with the specific germ that causes cold and not from chemical changes in the body."

Mona & Neapolis News

Mr. Eric Atkinson was a recent visitor to Calgary.

Mr. and Mrs. H. Roberts visited the southern city lately.

Miss E. Haines spent the Xmas vacation at her home here.

The absence of snow has allowed many of the farmers to haul in some of their summer supply of firewood.

Miss Doris Brown returned from Calgary on January 4th and resumed her duties at Mona School, the following day.

The pupils of Neapolis School held their News concert on December 19th. A very good program was given, after which refreshments were served.

Mrs. B. A. Atkinson returned from Calgary on December 21st, after attending the funeral of her father, who died of four injuries received in an automobile accident.

Mrs. W. J. McGee, Mrs. W. F. Hillyard, Mrs. W. A. Teskey and Mrs. Clarke, also the Misses Clarke and McGee were visitors at the home of Mrs. B. A. Atkinson on January 2nd.

A very successful concert was held in Community Hall on December 19th. The program was given by pupils of Mona and Gore Schools, and consisted of drills, dialogues, duets, recitations and songs. The chairman of the evening was Mr. Hugh Roberts. After the program, Santa Claus visited the hall and showered gifts on both juveniles and adults.

LOCAL & GENERAL

Eddie Clemens of Calgary spent Christmas with his parents.

Mrs. W. Morle, of Winnipeg, spent the holidays at her home here.

Mr. W. G. Evans was a visitor to Calgary last week.

Mr. Elmer Evans spent Christmas and New Year's with his parents. All ladies who wish to curl are asked to attend a meeting at the Rink on Friday at 3 p.m.

Mr. and Mrs. J. Russell spent Christmas with relatives at Cochrane.

Mr. and Mrs. C. H. Ashhead, spent Christmas with their parents in Calgary.

"A Congregation in the Making" is the theme at Knox Church on Sunday evening. Communion will be observed at the close of service.

Elwood and Howard Evans returned to southern Alberta after spending the Christmas vacation in town.

Mr. and Mrs. Chas. Radcliffe and family, of Kimberly B. C. spent the holidays with Mrs. Radcliffe's parents Mr. and Mrs. M. B. Clemens.

Elmer Evans, of Didsbury, was named premier of the eleventh annual Alberta Older Days' Parliament.

Mrs. Williams, and Miss Reda Williams, of Hanna, who formerly resided in Didsbury, are here renewing acquaintances this week.

Mr. A. G. Studer drove to Rhinora on Sunday with Miss Winnie Studer, who has obtained a position in the town school at that point.

Mr. and Mrs. Zimmermann, of High River, were visitors with Mr. and Mrs. S. Franklin over the holidays, and also visited other friends.

Edith and Lynn Hauspenger, Dorothy, Rebecca, and Elmer Reist, Russell Scherick, and Herb Dedrick were dinner guests at the home of Mr. and Mrs. Mike Snyder on New Year's Day.

Mr. H. W. Morgan made his debut as a golfer on New Year's Day. He was so well pleased with his game, he is going into heavy training for the Herald Trophy in July. Good Luck, Mongie.

Mr. Dave Christie, of Edmonton, president of the Northern Alberta Dairy Pool, and well-known breeder of Holsteins, spent Sunday and Monday of last week at the Norman Clarke Jersey Farm. While there, he purchased a young purebred Jersey bull, Didsbury St. Mavis Pilot.

Ducks reported to be going north in living formation. Robins "tipping their" the tulips, and a clear sky with the air like early spring. This seems to be our allotment for the winter, at least so far, and nobody grumbling. Stock still feeding in the stubble field, a very unusual and pleasing condition to the farmer, with coal bills and the Eskimo style of dress at this time of the year, both greatly reduced. We are almost afraid to comment on these strange phenomena, for fear that the weather man will prove us wrong, but nevertheless, these are the conditions as the New Year of '31 is making its appearance.

Moderate

We have made it our unvarying policy to keep our prices within the reach of all, for we feel that alike with service of the type we render. The matter of cost is, with us, at all times in the hands of those we serve.

General Motors announces a NEW CHEVROLET SIX

Bigger... Finer Lower in Price

TODAY General Motors and Chevrolet are proud to present a new Chevrolet Six. The new car has a lengthened, 109-inch wheelbase... beautiful new bodies by Fisher... de luxe wire wheels... and important mechanical improvements. Yet it sells at new reduced prices... the lowest at which any Chevrolet has ever been introduced.

With all its new beauty and added value, no departure has been made from the basic principles of six-cylinder operation and extreme economy which have won 2,000,000 owners to the Chevrolet Six... and made Chevrolet the world's largest-selling six-cylinder car.

Bigger—finer—lower in price... the new Chevrolet Six is now on display at the show.

SPECIAL SEDAN—A de luxe car... six valve wheels, top in leather with, and chrome-plated radiator grille standard equipment.

rooms of dealers everywhere.

Come and drive this bigger, finer Six today. If you can afford to buy any car... the new Chevrolet Six, at its extremely low prices, is easily within your reach.

The GMAC plan of deferred payments offers the lowest financing charges available... and the General Motors Owner Service Policy pledges lasting satisfaction.

Obituary.**WHITE**

Douglas Keith White was born in Sunnyslope, Alberta, on June 6th, 1927, and departed this life from the home of his parents, Mr. and Mrs. E. C. White, after a few days illness, on December 28th, 1930, at the age of 3 years, 6 months, and 22 days.

He leaves to mourn his early departure, his father and mother, one brother, Cyril, and one sister, Ellen as well as other relatives and friends.

The funeral, conducted by Rev. C. J. Hallman, was held at the home of the parents in Sunnyslope, after which interment was made in Three Hills Cemetery.

WESLEY

The sad news of the untimely death of Steve Wesley, aged 15, only son of Mr. and Mrs. John Wesley, Didsbury, Alberta, who died on Saturday, December 27th, as the result of an accident with his gun, while on a rabbit hunt on the Tuesday preceding his death, came as a great shock to this entire community. While hunting, he was accompanied by his chum, Mailand Perrin, of Didsbury, and they were both in the act of crawling through a barbed wire fence, when Wesley's 22-22 rifle accidentally shot off, the bullet striking him on the upward slant in the region of the right groin, and lodged there. The great loss of blood, and other complications soon proved fatal to the unfortunate boy. He was a ninth grade pupil in Didsbury High School, with a promising outlook for a bright and successful future.

Deceased leaves his parents, and two sisters, Annie and Kathleen to mourn his departure. The funeral service took place in the Evangelical Church on December 29th, Rev. H. E. Roppel officiating, and interment was made in Didsbury Cemetery.

The large attendance at the funeral spoke louder than words of the heartfelt sympathy of the general public for the bereaved family.

BRICKER

Funeral services for Mrs. Lydia Bricker, 83 years of age, who died Friday at Calgary, were held Tuesday afternoon from the United Church, Didsbury.

Mrs. Bricker came west thirty years ago with her husband and family and settled in the Didsbury district. She resided there until the death of her husband, the late M. K. Bricker, several years ago when she moved to Calgary and resided with her daughter, Mrs. Walter Geddes.

She is survived by two sons, Harry A. of Calgary, and L. D. of Saskatoon; and two daughters, Mrs. Geddes, of Calgary, and Mrs. C. W. Erb, of Ogema, Saskatchewan.

BURNS

It is with sincere regret that we report the death of Mrs. George A. Burns at the Didsbury Hospital on Sunday, Jan. 4th. Mrs. Burns had been in ill health for sometime and was brought to the Hospital about a week ago, where she passed away.

The funeral was held at the Knox United Church Rev. Hayes officiating. Mr. W. S. Durrer had charge of the funeral arrangements.

CARD OF THANKS

We wish to thank our many friends and neighbors, especially Mr. and Mrs. J. R. Cunningham, Mr. and Mrs. W. J. Scheidt, Mr. and Mrs. John Bogner, and Rev. H. Roppel and family, also the Hospital Staff, for their expressions of sympathy, and kindness shown to us during our recent sad bereavement, and for the many beautiful floral tributes.

THE WESLEY FAMILY.**ALBERTA HAS RECORD GAS SALE**

Gasoline sales in Alberta this year are expected to exceed 1929 figures by a considerable margin. For the

THE WHEAT SITUATION

Should not we be able to grow wheat as cheaply as any other large exporting country?

Three years ago the Consolidated Mining and Smelting Company of Canada Limited, working with the Dominion and Provincial Governments, began drilling in Ammonium Phosphate and Triple Super-phosphate with wheat seed on test acreages throughout the West.

In 1930 more than one thousand test plots of from five to eight acres each were laid out in Manitoba, Saskatchewan and Alberta. On each test plot an area was left unfertilized.

The results prove beyond a doubt that the use of Triple Super-phosphate and Ammonium Phosphate produces a very substantial increase in yield, a higher grade of grain, less rust, fewer weeds, and five to ten days earlier maturity. It has also been found that the fertilized grain has withstood the blowing much better than where the fertilizer was not used.

Below are examples of results obtained with *wheat* on the farms of the following co-operators:

	YIELD Bushels per Acre
O. S. A. PLOTS, OLDS	
Fertilized	45½
Unfertilized	34½
Increased Yield	11
P. A. SHAW, CARSTAIRS	
Fertilized	35
Unfertilized	22½
Increased Yield	12½
G. NIELSON, DIDSBURY	
Fertilized	33
Unfertilized	24
Increased Yield	9

Satisfactory Results were also obtained in the farms of:

A. LOUGHEED, Bowden J. BIRD, Innisfail
R. W. WOOD, Carstairs

It is not claimed that the application of these fertilizers will overcome all the difficulties now facing the Western Canadian farmer, but undoubtedly their use will prove to be a great factor in reducing his costs and in enabling him to maintain his place in the world's market.

The use of these Fertilizers is recommended to the Canadian farmer, not in an attempt to burden him with additional loads, but with the desire of assisting him in the solution of his present problems.

**THE CONSOLIDATED MINING & SMELTING COMPANY
OF CANADA LIMITED
FERTILIZER DEPARTMENT**

SASKATCHEWAN

ELEPHANT BRAND FERTILIZERS

period January 1 to September 30, the consumption in the province was 37,000,000 gallons, according to the records in the office of the deputy provincial secretary. The figures for the same period last year were 34,700,000 gallons.

There was a substantial increase in the September consumption, as com-

pared with the corresponding month last year, but owing to the early cold weather none is expected in October, July and August ran about even with last year, while the best months of the year were April and May.

Well over \$1,000,000 will come to the provincial treasury as revenue through the 5 cent tax, but the net

amount is amount is not yet known, because of the necessary delay in getting returns from all the counting points. Rebates for industrial and agricultural purposes have also to be made from the gross receipts.

For 1931 new automobile license plates have been entered to the number of 100,000.

WORLD HAPPENINGS BRIEFLY TOLD

"Tootsie," claimed by her owners to be the "world's oldest cat," is dead at Winnipeg. She was 23 years old. There are no survivors.

The net value of Britain's national wealth is now \$90,225,000,000 according to Sir Josiah Stamp, noted economist, who in 1914 put the figure at \$71,550,000,000.

The total estimated wealth of the prairie provinces is \$7,280,000,000, according to a statistic analysis issued by the industrial development board of Manitoba. This is 25.31 of the Canadian total.

The United States and France are shown by the bulletin of the Federal Reserve for November to control the World's supply of gold. Together the two countries hold about 60 per cent of all yellow metal.

Defending his country's policy in India, Sir Ronald Lindsay, as guest of honor at a dinner in New York, called the relations between Great Britain and India the most pacific in their history.

Juvenile immigration into Canada will be limited to actual demands, it was decided at a conference attended by federal and provincial government representatives and those of interested societies.

The Royal College of Physicians and Surgeons of Canada, organized a year ago, now has a constitution, set of by-laws and a code of ethics, all of which have been ratified by the fellows of the college.

A hostel is to be opened in Ottawa by the Canadian Legion to provide shelter for veterans of the Great War now in poor circumstances. It will have 30 to 100 beds and a free lunch counter.

Eighty-eight years ago, "Jerry" Poldoson, one of Winnipeg's noted pioneers and business men, died at his home, following an illness of only two days. He succumbed to an attack of pneumonia.

Vice-Admiral Sir Arthur Kipling Walcott, present commander-in-chief of the China station, has been appointed to succeed Admiral of the Fleet, Sir Roger Keyes, as commander-in-chief at Portsmouth.

Prince George Bibesco, of Rumania, was elected president of the International Aeronautics Federation, succeeding the Count de la Vaulx, who was killed in an aeroplane accident in the United States last fall.

Germany has made a demand before the preparatory disarmament commission that a general disarmament conference be called for November 2, 1931. No discussion on the suggestion took place.

The location of 60 families on 14,000 acres of good land between Morseville and Oyster River on Vancouver Island, one of the largest land settlement projects ever undertaken in British Columbia, is under consideration by the C.P.R.

Between 10 and 15 per cent of northern Saskatchewan's wheat is still unthreshed, according to a report issued by the soldier settlement board at Prince Albert. Thousands of acres of grain will remain under snow till spring.

Tree Seed Planted From Air
The forestry department of Hawaii has been engaged this season in planting tree seed by aeroplane. A U.S. army plane was used on the job. It was flown over a large eroded area and 1,685 pounds of seeds were dropped from an elevation of 2,000 feet. Mixed seed was used.

The Spirit Of The Red Cross

What the Junior Red Cross Is Trying To Accomplish For Peace

When the great conference of the world's Red Cross Societies met in London, England, with the Duke of York as Chairman, they saw at the Scala Theatre, by means of a play what the Junior Red Cross is trying to do in the world for peace, and health, and happiness.

In the words of the Spirit of Red Cross the trinity of aims was well expressed as follows:

I am the Red Cross; who am known of all men
To be merciful and compassionate.
And of my fellowship are such as would in turn serve

The sick and the suffering.
Many there be of my servants who have won
To Honour and Renown.

But for their most part their reward lies hidden
In the hearts of men.
And now call I the children to be of my company.

For they, too, can be helpers.
Following after their fashion in my footsteps
And weaving the threefold thread Of Health, Hope and Friendship.

Many there be of my servants who have won
To Honour and Renown.
But for their most part their reward lies hidden
In the hearts of men.
And now call I the children to be of my company.

For they, too, can be helpers.
Following after their fashion in my footsteps
And weaving the threefold thread Of Health, Hope and Friendship.

(By Eva A. Tingey).

LOVELY AND SMART

All Tingey models are created and sketched in Paris and the patterns are made in New York.

A charming chic tailleur — lovely and smart as paint — to be carried out in Bordeaux red tweed mixture in monotone effect, is today's model.

The right side of the pique crossover vestee is passed through a slot, terminating in a scarf end.

The triangular pockets lend a sportive air. At either side of the front of the skirt, inverted plaits provide the necessary width and flare to the hem.

There are also lovely vivid blues, greens and brown tweeds.

Wool jersey in cricket green, or black is stunning with white pique trim.

Wine red canton crepe with egg-shell faulle crepe and black crepe marocain with white are modish for all-day wear.

This pattern may be obtained in sizes 16 to 20 and 36 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Bar Convict Labor Goods

United States Takes Action To Prevent Importation Of This Nature

The treasury promulgated regulations against the importation of convict made goods, while a witness was telling the House Communist investigating committee how prisoners fare in Soviet camps.

The regulations require importers and shippers to show that importations from all countries are not produced by convict labor.

Russian goods have figured in several recent hearings at which the treasury was asked to bar certain products, but in announcing the regulations, Assistant Secretary Lowman said they were "not directed against Russia, but against everybody." They were issued under a law which required importers to post bond and submit a certificate of origin showing unpaid credits did not manufacture the articles.

May Tax U.S. Publications

Federal Government Likely To Impose Some Form Of Duty

The Montreal Gazette published the following despatch from Ottawa.

"A determined effort to lessen what amounts to unfair competition for Canadian manufacturers is almost certain to be made by the present government in its revision of the tariff for the coming session, by imposing some form of duty against periodicals entering Canada and bearing a large amount of advertising of foreign-made goods."

Such a blow would be aimed at large weekly publications from the United States, and it is expected that the duty will be imposed on a percentage basis, and that the publishers will be required to furnish advance copies of their publications to the department of national revenue for purpose of appraisal.

Fostering Home Industry

Saskatchewan Caught Fish To Be Used In Provincial Institutions

With a view to fostering the fishing industry in the northern part of the province, the government is substituting Saskatchewan-caught whitefish for the British Columbia product, formerly used in the mental hospital at Weyburn, the industrial school, Regina, and the old folks home, Wolsley.

The government has also written to the secretary of the Anti-Tuberculosis league suggesting the introduction of the Saskatchewan-caught whitefish in the sanatorium at Fort Qu'Appelle, Prince Albert and Saskatoon.

Demand For White Spruce

Is Most Important Commercial Tree To Grow In Canada

White spruce is the most important as well as one of the most widely distributed commercial tree species in Canada. It is found from the maritime provinces to British Columbia, and as far north as the mouth of the Mackenzie river within twenty miles of the Arctic ocean. It is one of the most northerly growing of Canadian trees. The white spruce is one of five native spruces. It is estimated by the forest service of the Department of the Interior that the total spruce stand, all species, in Canada is about 60,000,000,000 cubic feet of timber, or about 35 per cent of the total softwood stand. The estimate of white spruce is about 20,000,000,000 cubic feet, or one-third of the total spruce timber standing.

White spruce probably forms the greater part of the spruce lumber on the market, and its use has increased in recent years with the growing scarcity of white pine. It is used in greatest quantities by the manufacturers of building materials. Large quantities are used for siding, flooring, and roof sheathing, as well as for the manufacture of sash, door, and house trimmings. It is one of the leading woods in millwork of all kinds. Up to 1926 spruce ranked first in the amount of lumber produced annually, and it now ranks second only to Douglas fir. The average annual cut of spruce lumber is approximately 1,350,000,000 feet B.M., with a value of \$22,000,000.

Copyright Act

May Be Used To Seek Amendment To the Existing Act

Churches, exhibitions, bazars and other charitable or public organizations may be obliged to pay thousands of dollars for performing rights to music they use unless an amendment is made to the Canadian Copyright Act.

Such was the view put forward at the annual convention of the Canadian Association of Exhibitions held in Toronto recently. The association decided to consider the sending of a deputation to Ottawa to lay a request for an amendment before the government.

Sold Witnesses

The practice of establishing concrete monuments known as fundi mental bench marks—by the Geodetic Survey of Canada, Department of the Interior, in the course of its work in taking the elevation of the country above sea-level was inaugurated in 1925.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a feeling from souring and flatulency? Many believe they have heart trouble, and tremble with fear, expecting any minute to drop dead. This condition can be prevented, however, relieved. Take Carter's Little Liver Pills after meals and before bedtime. Sufferers from indigestion, flatulency, relief the gas and encourage digestion. The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c box of Carter's Little Liver Pills.

Bounty Aids Butter Import

Reason Australia Can Compete With Canadian Product Says Culler

The reason Australian butter can compete on the Canadian market is because there is a bounty of about nine cents on every pound exported, thus giving the Australian exporter heavy in price-cutting, according to J. A. Culler, former president of the National Dairy Council of Canada.

Mr. Culler pointed out that for every four pounds of butter produced in Australia, one pound was for export.

The speaker pointed out that 60 per cent of the Canadian West was suitable for dairy production, and he strongly recommended introduction of more raised farms in the West to overcome the present wheat depression.

Plotting Against Soviets

Reports State Leon Trotsky Is Directing Operations

Despatches to the Telegrapher Union from Kovno, Lithuania, recently said the Ogpa (Soviet secret police), had discovered an elaborate plot by anti-Communist factions in South Russia with headquarters at Taganrog.

The report said the plotters were acting under the direct advice of the exiled Leon Trotsky, who was reported to be at Istanbul, with the object of overthrowing the Stalin government.

An Ice Cream Tree

One tree in the greenhouse of Mrs. M. A. Hora at Memphis, Tenn., is very popular with the children. It bears a fruit that "tastes like strawberry ice cream and looks like corn." It takes the ears 18 months to ripen, according to Mrs. Hora, who got the tree from a St. Louis florist six years ago. The kernels are soft and mushy and very rich.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER VII.—Continued.

"You shouldn't feel that way," he went on after a thoughtful moment. "There's nothing in the least crude about you; but sometimes, dear, you're not so—so friendly with folks as I am. Perhaps you're bashful, but I've sometimes thought you'd be misunderstood by strangers. Tonight, you know—really you weren't especially cordial, Gay."

"Was I—impolite?" Her voice trembled, and Nick said quickly: "Lord, no. But I couldn't help wishing you'd act more—well the way you act with me."

"A queer little smile crossed Gay's face."

"The lady might be surprised, Nick, if I held her hand, or anything like that."

"She expected a hand, but she seemed not to have heard. He sat quite still, watching the shadows cast by the street light across the way. An automobile passed by, going too rapidly, but he took no notice. Two lovers strolled along the sidewalk, trading the night to hide their encircling arms, and, un-Nick-like, Nick made no comment. He sucked evenly at his pipe, and Gay moved close again to rest her cheek against his arm."

"It's a tipping night," said Nick. He drew a deep breath—almost a sigh. "I'd like to start right now and walk till sunrise."

Gay's cheek pressed closer.

"I—sometimes feel that way, too, Nick; and then I wonder if ever we'll do such things again. I can't of course; but there's no reason in the world why you shouldn't, you dear vagabond."

Nick smiled.

"The kids are a pretty substantial reason, seems to me not to mention the bank! A fine day's work I'd do tomorrow if I trumped all night." He arose reluctantly. "Come, dear, we must go up to bed. You're tired. Who was it told us that two babies were no more work than one?"

Wherever it was—she was a cheerful liar. "I—hark!" He sat down suddenly and had a detaining hand upon her arm. "There's Mrs. Halliday at the piano. She sings like a bird. Let's listen."

It was next day that Mary Maxwell made her call. She gave her report that evening, when she and John sat contentedly rocking on their comfortable screened porch.

"It was hot as summer at four o'clock, Johnny," she began. "So I wore my blue voile, and carried a sunshade, the fluffiest one Tom sent me for Judy's graduation. I looked real 'nifty,' as Tom, Jr. would say, and up-to-date. I feel sure there was nothing in my appearance for Mrs. Halliday to criticize."

"I'd like to see her try!"

John's tone was belligerent, and Mary laughed.

"I got my first shock when the door

was opened," she continued. "Who do you suppose opened it?"

"St. Peter?" suggested her husband hopefully; but Mary was much too interested in her subject to notice this frivolous rejoinder.

"Julie Nippes! She's there permanently, and Mrs. Halliday's got her all steged up in a cap and apron. I should have thought she'd roast."

"If you refer to Julie, and she wore only a cap and apron," began the listener, when his wife cut in: "John Maxwell, don't try to be funny, or interrupt. It was the black dress I meant—mohair, my dear—long-sleeved—with cuffs, and the thermometer at eighty! I like a well-dressed maid as much as anyone, but I've never yet forgotten that they're flesh and blood like the rest of us; and black, in summer, and long sleeves—"

"It's only May, my dear."

"Well, May in Bakersville might be August anywhere else. Anyway, I wanted to scream because Julie looked so funny. She's bobbed her hair, and—"

"Je-hoshaphat!" exclaimed John Maxwell. "She must look—"

"She does! I told you I wanted to scream. But I didn't, I went with really remarkable self-control." Good afternoon, Julie: Is your mistress at home?"

"You mean Mrs. Halliday?" asked Julie. "I heard her say last night that she did hope no more stupid Bakersvillians would call, but there ain't nothing stupid about me, Mr. Maxwell, so I guess she'll see you. You wait, and I'll go find out."

"Oh, Lordy!" chuckled John Maxwell, reaching with mirth. "Oh, Lordy! if I tell Julie to tell Well, my dear, were you eligible?"

"Evidently I was, Julie left me at the door, but I went into the living-room myself, to save the girl a scolding in case Mrs. Halliday saw fit to receive me. Oh, Johnny! you should see that room! Whatever else the woman is, she knows how to arrange a house. White paint—soft grey walls—a few fine water colors to brighten things—comfortable chairs—a beautiful piano at the north end—soft-shaded lamps—"

"Look here!" interrupted John Maxwell suddenly, "are you making an inventory for the insurance man?"

"I could," answered his wife decidedly. "I saw everything there. I had plenty of time. I waited twenty minutes. The draperies—"

"Cut out the draperies, my dear, and come to the woman. It's she who interests me!"

"Well, my dear John, most men would have found her interesting. She wore a blue Japanese silk that matched her eyes so perfectly that you could see nothing else. Her hair—well, in these days of bobs it was really noticeable, and unless she keeps a maid to do it for her, she has my sympathy! Yet it looked simple. Any man would have called it simple—except her husband. She wore silver slippers, John—in the afternoon—in Bakersville! Her stockings—"

"I understood," said John Maxwell with a touch of good-natured sarcasm. "I'd say she was nothing but her eyes. What did she say?"

"She made a very pretty apology for keeping me waiting. It seems that after lunch she 'relaxes' until four-thirty. How does one relax, Johnny? I don't know. I've ever done it, but it sounded fragrant. I wondered if she made Julie relax too. I admired the house, and she seemed gratified. It was the garden, however, that brought them to Bakersville. She adores gardens and growing things with the exception of children. I gathered later. Nature is rather a hobby with her—a pose, if I'm not mistaken; though her eyes (childlike and blind) doesn't half describe them, Johnny, bells my judgment."

"She offered to show me the garden. When I assented she touched a bell and Julie appeared. Poor Julie! She cast an apologetic glance at me, John, and—bobbed a curtsey! Imagine it! Julie Nippes, who's gone out by the day to everyone in Bakersville for the last ten years, bobbing a curtsey. It must be some new idea. And Mrs. Halliday said: 'Julie, we'll have tea in the pergola,' and Julie bobbed again and scuttled out of the room."

"Taking her bobbed hair with her, I suppose," supplemented John Maxwell. "Go on."

"I'd go on faster if you didn't make such delicious additions to my story. We went outside, through a beautiful new French door, Johnny, and just as we reached the pergola Mr. Halliday came out of the garage. He saw me

too late to dodge, which was his evident desire, so she had to present him."

"Do you know, John Maxwell, for a moment I felt sorry for that woman, tied to such a tombstone of a man; but when I left the shoe on the other foot. I was sorry for him."

"Now we're getting at the facts," John Maxwell drew a satisfied breath, and his wife laughed.

"We've been getting at them all the time," she said pitily. "Only you're too dense to see it. But you know that a woman's house is her temple—that nothing in it is too trivial to have some meaning? That living-room now—for all its dainty touches it's a room a man would adore: big chairs, you know, and lights just right for reading and—"

"In mercy's name don't return to that living-room," exclaimed John Maxwell. "Get back to the pergola, and what made you sorry for Mr. Halliday?"

"Well, I can hardly explain it; but once he was introduced she almost ignored him; though in justice to her I'll admit that he didn't seem to care, and he kept looking at her in a perfectly making way, so much as to say, 'What new piece is this, I would like to know?' He did start to leave us once, but just then Julie appeared with a tea wagon—"

"Did she ask Julie to pour tea?" queried John Maxwell innocently.

"His wife threw him a withering glance; then she shook with mirth. 'It was a joke on me, John, but for just a second I thought it was a baby carriage! I didn't think they had children, but—'

"They haven't. Nick tells me that children would interfere with their careers."

(To Be Continued.)

Varieties Are Numerous

Japanese Glad To Secure Chrysanthemums Grown In Canada

The flower of gold, or the golden flower, for this is the literal meaning of the word chrysanthemum, may have been a term appropriate enough when it was first cultivated in the Orient, but now its application is dubious. Horticulturists, and particularly those in the west, have developed so many shades and varieties that they almost range across the spectrum. When the chrysanthemum was first introduced into Canada we do not know, but it is less than 200 years since the first blossoms of this plant were admitted as a curiosity in Kew gardens, London, England. Probably the chrysanthemum came to Canada about the time that it reached the United States, in 1801, then in the throes of the civil war. But since that date the varieties developed on this continent have been so diverse and so numerous that the Japanese have been delighted to secure them. We have become so accustomed to chrysanthemums that it is not easy to realize that the first show among the English-speaking peoples was staged in Norwich only 101 years ago.

Persian Balm promotes cleanliness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, soothing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-lust in texture. Truly a perfect toilet requisite for every discerning woman.

Wisdom Of St. Swithin

Idea Of Helping Poor People Could Be Used Today
Among the achievements of St. Swithin was the creation of a kind of poor law to meet the needs of his time. This was an ordinance that every ten families should be responsible for keeping one poor person. There can be little doubt that the "covenant" of ten families saw to it that work was found as quickly as possible for their ward, and that he was taken off this eighth century dole at the earliest possible moment. Public opinion in every village in those days was less diluted with tenderness for the wretchedly idle than it is today.

Minard's Liniment aids Sore Feet.

Will Use Western Coal
Contracts have been awarded by the Manitoba Government for 29,500 tons of coal, costing \$152,625. Hon. W. T. Chubb, Minister of Public Works has announced. Only Western Canadian coal will be used, he said.

Musk-Oxen In Northern Canada

Between Nine and Ten Thousand Animals In The North

Between 9,000 10,000 musk-oxen roam the northern islands and mainland of Canada, according to the estimate of W. H. B. Hoare, of the Department of the Interior, whose report of his examination of the Thelon game sanctuary east of Great Slave Lake has just been issued by the Northwest Territories and Yukon Branch. Mr. Hoare spent two years in the north, 1928 and 1929.

Canada and Greenland are the only countries in the world where at present the musk-ox is to be found in its natural state. It equals in size one of the small breeds of Welsh and Scotch cattle and in appearance resembles a small buffalo.

There are 250 of the animals in the Thelon sanctuary, while Mr. Hoare believes the greatest herd is on Melville Island where 4,000 herd roam today. He estimates about 1,000 musk-oxen in North and East Greenland.

R. M. Anderson, chief of the biological division of the National Museum in an appendix to the report, gives a higher estimate, stating Canadian herds total 12,900 animals and Greenland 1,500.

Road Gravelled To Park

Highway From Prince Albert To National Park Is Now Completed

The highway from Prince Albert to the Prince Albert National Park is now an all gravelled, all weather road, while the graveling from Saskatoon to Prince Albert is rapidly approaching completion. This was the statement made at the quarterly meeting of the Prince Albert Board of Trade, when great satisfaction was expressed at this accomplishment, which it is anticipated, will be of great value to the city.

P. W. Mahon, chairman of the transportation committee, commented at length on the benefits accruing to Prince Albert through the highway, and stated that while it was an expensive undertaking yet he believed it was a forward step.

Satisfaction at the possibility of developing a power unit at the Big Bend on the Saskatchewan River was also expressed. Hydro power from this source within the next few years in quantities sufficient to supply the province was visualized.

Nation-Wide Fame. — There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from indigestion. It soothes the inflamed membrane of the throat, and it can also be taken internally.

Recipes For This Week

(By Betty Barclay)

DATE BARS

- 1 cup stoned dates.
- 1 cup nut meats.
- 1 cup powdered sugar.
- 2 eggs.
- 1 tablespoon melted butter.
- 2 tablespoons lemon juice.
- 4 tablespoons flour.
- 1/2 teaspoon salt.

Put dates and nuts through food chopper. Add sugar and beaten eggs and mix well. Add melted butter, lemon juice, flour and salt and mix thoroughly. Spread evenly in a greased shallow pan, having mixture one-fourth inch deep. Bake in a moderate oven, 225 degrees Fahrenheit, about 30 minutes. Cut in strips and roll in powdered sugar while hot.

CRANBERRY DESSERT

- 1 junket tablet.
- 1 tablespoon cold water.
- 1 cup cranberry jelly or marmalade.
- 1 pint milk.
- 3/4 cup powdered sugar.
- 1/2 teaspoon vanilla.

Prepare the junket according to directions on package. Pour at once into individual dessert glasses and let stand undisturbed in a warm room until firm about 10 minutes. Then chill. When ready to serve add cranberry jelly or marmalade to each dish. A topping of sweetened whipped cream may be put over the cranberries if desired.

Minard's Liniment for all Pains.

Flaky Pie Crust

The secret of making good pie crust is: "Use Purity Flour—and keep the dough dry!" Try this recipe—for 2 shells:

- 3 cups Purity Flour 1 cup lard
 - 1/2 teaspoon salt 1 cup cold water.
- METHOD: Mix the flour and salt, cutting in half the shortening until the mixture is like fine meal; gradually add the water, one drop at a time, until the dough is like a firm ball. Use less water, if you can, and the pie crust will be flakier.
- Turn out on board very lightly sprinkled with Purity Flour. Roll about 1/8 inch thick. Spread balance of shortening over dough, roll over three times and roll again to round thickness. Bake in hot oven (425°).

Western Canada Flour Mills Co. Limited, Toronto, Winnipeg, Calgary.

PURITY FLOUR

Little Helps For This Week

"He which soweth sparingly shall reap also sparingly; and he which soweth bountifully shall reap also bountifully."—2 Corinthians ix. 6.

All life is seed sown in Time's yawning furrow.

Which with slow sprout and shoot, In the revolving world's unbroken now.

Will blossom and bear fruit.

—Mathilde Blind.

When I sow my good treasure broadcast as Christ did, when I give myself with what I am giving—then, as the earth never fails of her harvest, but in the old world or the new will surely bring us our daily bread, so the soul can never fail of her divine returns. Here or yonder, in the full time comes the full blessing: the flower flashing out glory, the fields laughing with plenty.

—Robert Collyer.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Norway Secures Island

Claim To Island Off Greenland Coast Is Recognized By Great Britain

It is officially announced that Great Britain has recognized the Norwegian claim to the island of Jan Mayen, a desolate land lying between Greenland and North Norway in the Arctic sea. Norway's claim to sovereignty was put forward in a royal decree dated last May 8.

In general it is accepted that the island was discovered by Henry Hudson, British navigator, in 1607.

The island is 34 miles long and nine miles wide at its greatest breadth.

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your bottles was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkins, Box 14, Thonolow, Ontario.

Lydia E. Pinkham's Vegetable Compound

For all the ailments of women.

Prevent Dan'ruff
and promote the growth of your hair by rubbing the scalp with Minard's four times a week.
